**Thanks for taking a look at our software**

My name is Steve and I am with Best Bid. Let me help you with your estimating needs. The two videos below will give you a quick glance at how the Best Bid Hybrid Pro works. The first video is about the estimating side of the software and how quickly you can turn quantities into an estimate. The second video shows the On-Screen side of the software and how the counts transfer into the estimate.

**Please review these Best Bid Videos.**

**Estimating**

[Please Watch video Now](#)

This video is how the On-Screen Takeoff module, which is built in the software, transfers the counts to the estimate.

## It Is No Longer A Choice-You Need Electrical Estimating Software

Today you must have **electrical estimating software** to keep up with the demands of electrical contracting. It is no longer a choice! It is important to be able to create detailed estimates with your electrical estimating software without breaking the bank or going to special classes just to get started.

Knowing the importance of having electrical estimating software makes it easy to take advantage of the user by charging per seat or per license, for technical support, yearly updates, or ongoing monthly fees that never end. At Best Bid Electrical Estimating Software we are here to help electrical contractors like you with all of your electrical estimating needs and have created a line of electrical estimating software that not only provide detailed estimates but is easy to own and easy to use. Homemade spreadsheets will no longer work to provide you with the speed, accuracy, and details needed to succeed in the electrical estimating environment of today.

The **Best Bid Hybrid Pro** is the most amazing electrical estimating software for any size electrical contractor and comes with built in On-Screen Takeoff at no extra charge. Once you check out the Best Bid Hybrid Pro you will instantly know that this estimating software is just what you have been looking for to produce your electrical cost estimations.

**We can help you with your estimating needs!**

**Let us help move you from the ditch to the office.  
We can teach you to estimate or estimate better.**

**If it is Electrical Estimating Software you need.**

**The Best Bid Hybrid Pro-is Less than \$2,000.00**

**One-Time Fee for life!**

**Best Bid Electrical Estimating Software has anything that you need to be a successful electrical estimator.**

What sets us apart from the competition?·

- We can teach you to estimate or estimate better, because we are not sales people we are electricians, estimators, and contractors that know your business.
- All we do is electrical so all of our attention is focused on your industry.
- Our software was created by electricians for electricians. We know how to estimate and we know what you need to estimate. We make it as simple as possible to use, while providing high tech solutions for your estimating needs.
- **One-Time fee or life.**
- **Unlimited license.**
- **Free Technical support.**
- **Life Time updates.**
- We are less than ½ our competition before the extra charges that they add.
- Best of all Best Bid comes with the resources of successful electrical estimators and electrical contractors to ask questions and pull from their knowledge. This is worth more than the software cost.
- Our software was designed by electricians not computer Geeks. It works like electricians think with simple to use screens.
- Our software is extremely flexible and allows you to estimate the way that you want to.
- Best Bid comes with presets to save you hours but can be changed on the fly or permanently to suite you.
- Our software has its own takeoff module built into the software not having to use a third- party company. This is a huge advantage over other software companies that use two different software to perform this function and then try to merge the information back together.
- Our software is built to work twice as fast as other software letting you complete many entries all at once in lieu of one at a time.
- Expandable database that can import whole categories of material very easily or add your special list of items..
- Create unique parts list for certain projects and save them for future estimates.
- Back up your database in seconds and share with other users. Work from home and finish at the office.
- Our software is NOT CLOUD BASED. Don't lose a job because the internet is down.
- Substitute items that change as the estimate progresses such as set screw fittings to compression or copper to aluminum.

### **Summary**

**There really isn't a good reason to purchase any other software.**

## Additional Information

With Best Bid you can always trade up to the next product and use your full purchase price toward your next purchase. Check out our pricing at: [www.bestbidestimating.com](http://www.bestbidestimating.com)
